Dear (Contact First Name):

It's the one thing that every organization has: data. But when it comes time to consider storing it offsite, there are no easy answers...no one size fits all. Should you turn to a data center? The cloud? A hybrid approach? What makes sense for you?

Join ATP in April for a moderated panel discussion that can help you get the answers you need. Featuring a mix of prepared questions and audience Q&A, this seminar is sure to provide you with valuable information in making a critical decision for your business.

We'll consider questions like:

- What do providers have to offer when it comes to one of these solutions?
- Why are so many enterprises adopting one or more of these solutions?
- Who can provide my organization the best solution?
- Where are these providers located and why does it matter?
- When should I look at adopting one of these models? Or should I change to a different model?

Panel presenters include an independent data center consultant as well as representatives from:

- Cologix
- Expedient
- PCM
- Rack Squared
- Peak 10

Plan now to join us on April 8th, 2015. The meeting will kick off at 11:00 A.M. with registration beginning at 10:30 A.M. This is an easy, affordable opportunity for learning, lunch and networking. We look forward to seeing you.

Sincerely,

Curtis Davis
President, 2014
