

Join ATP in April for:

ERRC Code Changes & You

*The What, How, and Why of
Emergency Responder Radio Coverage*

Images like this are in the news far too often. But they represent only one type of emergency that can occur in large buildings.

Fires, heart attacks, equipment accidents...we hate to think they can happen but they do. And when they do, we need to reach help as quickly as we can. That's what the ERRC code changes are all about.

ERRC Code Changes & You

In ATP's April seminar, we'll learn more about what these changes are, and what they mean for us both as IT professionals and as employees and visitors in covered buildings. We'll also discuss how organizations are implementing technology to comply with the ERRC Code.

Our speakers include:

- Battalion Chief David Ringley of the Columbus Fire Department
- Chip Chapman, President of Integrated Building Systems (IBS)

IBS is also our host for April. Founded in 1993, IBS helps companies that are building, updating, or moving offices to make wise investments in technology. With these differing perspectives on a vitally important topic, our April seminar is one you can't afford to miss.

ERRC Code Changes & You

Where

Integrated Building Systems, 950 Michigan Avenue, Columbus, OH 43215

When

Wednesday, April 13th, 2016. Registration begins 10:30 a.m. Seminar begins at approximately 11:00 am and adjourns between 1:00 and 1:30 p.m., depending on questions.
