From the largest multi-national corporation to the smallest mom-and-pop shop, every organization may face threats to their information security. Publication of confidential emails, theft of customer financial data, invasion of individual business bank accounts...incidents like these have become part of the daily news. They can literally make or break your business.

Join ATP in June as we discuss preparing for cyber threats, managing incidents, and responding in a way that can turn threats into opportunities. We're excited to welcome two informative and compelling presenters for this program:

**Shawn Sines** is a seasoned information security professional who has held positions leading high explosives on attack aircraft, working as a "rentable mercenary" building information security incident response programs, and, in numerous crises, has been the bearer of bad news as technical translator to executives.

Shawn worked for THE Ohio State University as a security outreach specialist, The Columbus Dispatch as a journalist and systems engineer and recently for Scott's Miracle-Gro as an Information Security Strategist. Presently he works in security consulting for Stealth Entry. Shawn is a Certified Information System Security Professional (CISSP) and Access Data Certified Forensic Examiner.

**Bill Lisse** is the Head of Global Security for OCLC, a global organization providing managed hosting, SaaS, and PaaS services. Bill has more than 25 years of success leading information security, risk management, IT audit, and investigations.

A technology navigator who successfully communicates complex

technical risk issues with non-technical executives, attorneys, and financial partners, Bill has performed resident positions in Asia and Europe and has managed extensively in multinational environments.

Plan now to join us on June 10th, 2015. The meeting will kick off at 11:00 A.M. with registration beginning at 10:30 A.M. This is an easy, affordable opportunity for learning, lunch and networking. We look forward to seeing you.
