

If you think tracing the cords under your desk or behind your TV is hard,
try doing it for an entire office building!

Join ATP in June for:

Unplugged!

The Future of Power over Ethernet

Let's face it: managing power to devices in our connected world can be a real mess.

Happily, there's a solution on the horizon. Its name? PoE.

The Future of Power over Ethernet

In ATP's June seminar, we'll explore what advances in power over ethernet, or PoE, can mean for your organization, considering topics such as:

- Potential applications (computers, security cameras, HVAC sensors, lighting, and more)
- Architecture for PoE networks
- Issues and resolutions (heat generation and dissipation, deployment skills, and so forth)

Our speakers include:

- Amir Sekhavat, Director of Global Product Management Premises Copper & Fire, Alarm and Security for Superior Essex. Amir is an experienced and knowledgeable speaker with 15+ years in the industry.

Cologix is once again our gracious host for June. Cologix provides reliable, secure, scalable data center and interconnection solutions from 24 prime interconnection locations across 9 strategic North American edge markets. If you use power in your organization, and reading this invitation means you do, our June seminar is one you can't afford to miss.

Unplugged! The Future of PoE

Where

Cologix, 555 Scherers Court, Columbus, OH 43085

When

Wednesday, June 8, 2016. Registration begins 10:30 a.m. Seminar begins at approximately 11:00 am and adjourns between 1:00 and 1:30 p.m., depending on questions.
