Dear Gina,

Servers. Workstations. Printers. Maybe a scanner or two. Remember when all IT had to manage was a LAN and those kinds of connections? Those were the good old days...and they're gone.

Today, IT manages a wide array of devices connected by LAN, WAN, and Internet. From smart phones to tablets, security systems to cloud storage to smart utilities--how can your team effectively administer the Internet of Things for your organization?

Join ATP in October as we discuss this timely question. Our speakers include:

Brannan Kelley, CIO and Executive Management for American Municipal Power. Brannan has been recognized nationally as one of the Top 20 Most Innovative CIOs. He has led the transformation of IT at his firm from just another department to a true business enabler.

Plan now to join us on October 14th, 2015. The meeting will kick off at 11:00 A.M. with registration beginning at 10:30 A.M. This is an easy, affordable opportunity for learning, lunch and networking. We look forward to seeing you.

Sincerely,

Curtis Davis
President, 2015
