Dear Friends and Guests of ATP,

From cloud to co-lo, today's global enterprise has more options than ever before. The media would have us believe that transitioning to the "cloud" is easy and trouble-free...but those of us in the industry know better. Join us for our August seminar as we discuss the pros and cons of creating and maintaining a global infrastructure.

We'll be sticking with the lunch-and-learn format, and there will be lots of networking opportunities as well. Speakers are still being finalized, but we want to make sure you have plenty of time to save the date.

Plan now to join us and enjoy a thought-provoking and affordable session. We look forward to seeing you!

Sincerely,

Laura Engle
ATP President, 2011

For more than 20 years, the Association of Telecommunications Professionals, Inc., (ATP) has been promoting effective design, operation, and management of telecommunications voice and data systems.

ATP provides a vendor-neutral, unbiased forum for members to exchange ideas, innovations and applications at bi-monthly meetings. The meetings, in turn, establish a community for common interest and promote personal advancement within the telecommunications profession.
