Friends and Guests of ATP,

I love Panera Bread. In my opinion, it's good for many things, most of which taste marvelous. However, as a "plan" for business continuity and disaster recovery, Panera leaves a lot to be desired. Many of us discovered that during the windstorm of August, 2008. But how many of us have a new approach in place?

Plan to join us Wednesday, December 9, for our final meeting of 2009, which will focus on business continuity and disaster recovery planning. Hope to see you there!

Sincerely,

Gina George

ATP President, 2009

The Urgent Need for Research in BCP

ATP is excited to offer this presentation by Dr. David Lindstedt, Director of the Enterprise Continuity Management Program for The Ohio State University.

Dr. Lindstedt's presentation will focus on the current state of business continuity, how it differs from "business resilience" and how to obtain management buy-in for business continuity planning.

BCP Planning In Action

Following on Dr. Lindstedt's presentation, Mark Horne from SunGard will provide insights as to how a business continuity/ disaster recovery plan can take shape. SunGard offers a complete range of information availability solutions, technology and systems management services for application and data center outsourcing, and business continuity consulting services and planning software. More than 10,000 businesses and institutions across North America and Europe rely on SunGard to help them keep their people connected with the information they require in order to do business.

For more than 20 years, the Association of Telecommunications Professionals, Inc., (ATP) has been promoting effective design, operation, and management of telecommunications voice and data systems.

ATP provides a vendor-neutral, unbiased forum for members to exchange ideas, innovations and applications at bi-monthly meetings. The meetings, in turn, establish a community for common interest and promote personal advancement within the telecommunications profession.
