Friends and Guests of ATP,

Happy 2015! ATP is excited to start the new year with a February seminar on a topic with great promise for our industry. It's true that we have more than our fair share of acronyms, but here's your chance to learn about a new one with phenomenal potential: GPON.

Gigabit Passive Optical Networking (GPON) is a point-to-point access mechanism that uses passive splitters in a fiber network. Ultra-secure and bandwidth-efficient, GPON has been shown to offer:

- Up to 70% lower capital expenditure
- Up to 50% reduction in network power
- Up to 90% reduction in required floor, rack, and cabinet space

GPON may seem like technology of the future, but that future is here. This seminar will be framed around the actual GPON deployment at NiSource. Presenters include:

- Prajwal (Praj) Deshpande, NiSource Program Director/IT Service Delivery
- George Stephenson, NiSource Enterprise Architect Manager-IT Planning & Operations
- Chip Chapman, President of IBS (consultants on this project)

Plan now to join us on February 11th, 2015. The meeting will kick off at 11:00 A.M. with registration beginning at 10:30 A.M. This is an easy, affordable opportunity for learning, lunch and networking. We look forward to seeing you.

Sincerely,

Curtis Davis
President, 2014

For more than 20 years, the Association of Technology Professionals, Inc., (atp) has been promoting effective design, operation, and management of technology, telecommunications systems and networks.

atp provides a vendor-neutral, unbiased forum for members to exchange ideas, innovations and applications at bi-monthly meetings. The meetings, in turn, establish a community for common interest and promote personal advancement within the telecommunications profession.
