

IoT: 28 billion devices are connected to the internet.....
50 billion by 2020!

What will this mean for your company network?

June 14th: Internet of Things

What?

Internet of Things - we are talking IoT with experts from Ohio University and Ice Miller

Who?

Dr. Julio Arauz, PhD. J. Warren McClure School of Information and Telecommunications at Ohio University. Dr. Arauz, a former research scientist for NEC Networks with a PhD in Information Science, teaches our future IT Directors the bits and bytes of IoT while exploring the technologies and applications emerging today.

Lindsay Miller, Attorney with Ice Miller's Public Affairs and Government Law Group. Lindsay works to build relationships with public and private stakeholders of broadband and technology initiative stakeholders. Previously, Lindsay was the Executive Director of Connect Ohio, a non-profit focused on facilitating broadband access, adoption and use throughout the state.

Where?

Map to PCM
