Dear Friends and Guests of ATP,

Whether you're a system administrator or "just" an end-user, network security can and will impact your daily life. What is the current thinking on security essentials, and how can we make sure that the need to stay secure works with, not against, our other business objectives? Join ATP in April to find out!

Our key speaker will be Matthew Dalton, Director of Information Security for Ohio University. Matt leads the team responsible for OU's Information Security Program, covering such areas as compliance and risk management, security architecture, awareness and training, business continuity planning, and identity and access management. Matt is formerly the Information Security Manager for the University of Rochester, and holds a Masters Degree in Information Assurance from Norwich University.

Matt's presentation on Enterprise Security Essentials will touch on what you need to know, **now**, in areas such as risk management, cyber-attacks, authentication basics, VPN/IPSec strategies, and more.

Plan now to join us on April 9, 2014. The meeting will kick off at 11:00 A.M. with registration beginning at 10:30 A.M. This is an easy, affordable opportunity for learning, lunch and networking. We look forward to seeing you.

Sincerely,

Laura Engle
ATP President, 2014

For more than 20 years, the Association of Technology Professionals, Inc., (atp) has been promoting effective design, operation, and management of technology, telecommunications systems and networks.

atp provides a vendor-neutral, unbiased forum for members to exchange ideas, innovations and applications at bi-monthly meetings. The meetings, in turn, establish a community for common interest and promote personal advancement within the telecommunications profession.
