

Somebody's Watching You: The Technology of Physical Security

Event Info:

When: Wednesday,
December 8, 2010.

**Registration begins 8:30
a.m. Meeting begins at
9:00a.m. and adjourns
at noon for the included
lunch.**

Where:

OCLC Inc.
6565 Kilgour Pl. (previously
Frantz Rd.)
Kilgour Building - enter from
the East
Free parking is available

Fee:

Free for the first guest from
each member company
\$20/additional attendee from
each member company
\$30/non-members
Pre-registration assists us in
keeping our costs down, and
provides a more accurate
count for seating and lunch.

**Pre-register to be eligible
for our door prize drawing!**

Pre-register at:

www.atp-ohio.org

Dear Members and Guests of ATP,

If you still think surveillance and security involve VCR tapes and grainy images from analog cameras, you'll be amazed to see the presentations at our December meeting. Security and IT are converging, and the time to prepare yourself is now. The December meeting will also include a vote on by-law revisions, so this is not a meeting to miss. Please join us...we look forward to seeing you!

Sincerely,

Gina George

ATP President, 2010

Security and IT: An Overview

VCRs are being replaced by DVRs and now NVRs. Analog cameras and grainy images have given way to IP cameras and crystal-clear digital video. And the security office with its wall of monitors is now often one monitor with an Internet connection.

There's no question that security is becoming more and more IT-centric, so IT professionals need to improve their understanding of physical security's capabilities and requirements. In this presentation, you'll see how surveillance and recording systems have changed, and learn the critical items you need to keep in mind when your organization comes to you for physical security support.

Keith Hall is Regional Security Manager for **Anixter**, a leading global supplier of communications and security products, electrical and electronic wire and cable, fasteners and other small components. Anixter helps customers specify solutions and make informed purchasing decisions around technology, applications and relevant standards. Throughout the world, the firm provides innovative supply chain management services to reduce customers' total cost of production and implementation.

Physical Security In Action

Once you've gained a basic understanding of IT/Security convergence, this presentation will help you see some of the ways your colleagues are putting the technology to work. From traditional security applications like convenience stores and banks, to mobile surveillance, innovative camera positioning and use of video as a learning tool, there are multiple ways to make surveillance and recording pay for your organization.

Gina George, MCSE, is Service & Projects Manager for **Sound Communications** and the outgoing president of ATP. Established in 1983, Sound Communications (SCI) is a veteran-owned small business providing digital voice, video and data recording to mission-critical customers in the public and private sectors. A Verint-certified Master Distributor/Services Partner, SCI engineers, installs and maintains voice/radio/911 recording systems. SCI also installs/services digital video surveillance, mobile, and portable solutions.

For more than 20 years, the Association of Telecommunications Professionals, Inc., (ATP) has been promoting effective design, operation, and management of telecommunications voice and data systems.

ATP provides a vendor-neutral, unbiased forum for members to exchange ideas, innovations and applications at bi-monthly meetings. The meetings, in turn, establish a community for common interest and promote personal advancement within the telecommunications profession.
